

If it is not perfect,
we are not satisfied.

- Water Proofing
- Epoxy Flooring
- Floor Densification
- Pu Concrete Flooring
- Grouting
- Diamond Concrete Cutting
- Structure Strengthening & Repair

ABOUT COMPANY

Since 2015, Deep Civil Solutions is engaged in providing various kind of civil construction services that include civil construction work, civil engineering services & infrastructure Development Services & interior designing

Further, we provide one stop platform to solve problems in construction filed such as epoxy flooring, epoxy coating, PU flooring, PU coating, all types of water proofing, structure strengthening, floor densification, diamond concrete cutting, coating for metal and Concrete Structures

WHY OUR COMPANY

- GREAT VALUE
- GREAT SERVICE
- AWESOME MANPOWER
- AWESOME MANAGEMENT OF TIME
- SYSTEMATIC SOLUTIONS AND WORKING
- TRUSTWORTHY AND HONEST

We only employee fully qualified, experienced industrial painters to undertake our projects. This helps us to maintain our well-earned reputation.

Education begins the gentleman, but reading, good company and reflection must finish him.

HOW WE WORK

We understand the importance of preparing the surfaces properly before commencing any work, removing and cleaning away loose paint and the like ensuring the finished surface will last longer.

» IT IS THIS

attention to detail that has seen us gain such a high reputation for industrial painting.

» Other reasons to use our service include:

- Flexible working hours
- Value for money
- Tailored packages
- No obligation, free quotations

SATISFIED CLIENTS

- Balaji Wafers Private Limited - Rajkot
- Balaji Wafers Private Limited - Valsad
- Mother Dairy - Junagarh
- Bhagwati Floor Mills (gaay Besan) - Ahmedabad

Raw Materials

We use high quality & certified products and ensure that the end finish provided is of superior quality. We are also concerned regarding the safety & welfare of our work force. For this, we take all necessary measures for ensuring safe as well as clean working environment for them.

SERVICES

Epoxy Flooring & Coating

Floor in industrial plants are maximum use and for there protection using epoxy, polyurethane concrete and other Aggregate filled flooring system. We offer to our clients highly effective Mortar floor coatings which are extensively used for self leveling applications of moter floors.

- Self leveling epoxy floor system
- Heavy duty epoxy mortar floor system
- Solvent based resin electrically conductive coating
- Polyurethane medium/heavy duty floor mortar system
- Solvent based acrylic system
- Solvent based epoxy floor coating
- Solvent free anti static floor coating
- Multi Leveling Epoxy Floor System

SERVICES

Water Proofing

Waterproofing systems use designed to protect concrete from the intrusion of liquids into or through concrete crack and in some cases joints. We are offering a wide range of water proofing services to our esteemed clients.

- Acrylic and polymer based waterproofing treatments
- PU and coal tar based coating
- Food grade water proofing coating for water tank & swimming pools
- Liquid applied Membrane
- Add modified Membrane
- Epoxy and polymer based injection grouting

SERVICES

Floor Densification

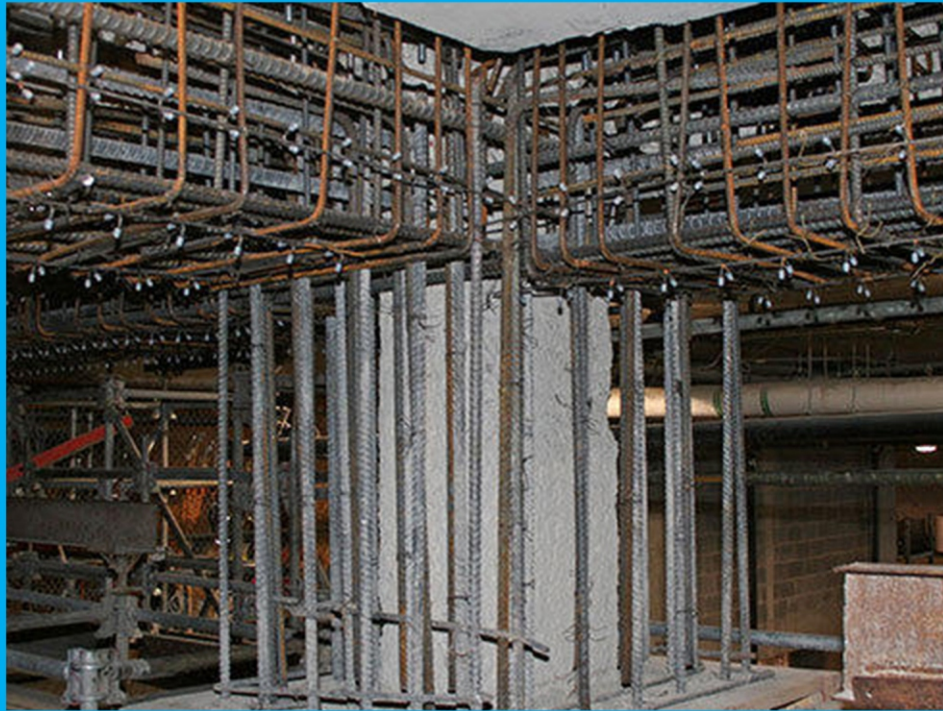

Floor Densification is a practical, decorative and economical floor system for any facility. Floor densification is a becoming one of the fastest growing products floor densification is a multi step mechanical grinding & polishing process that utilizes industrial diamonds & liquid hardener to level densify polish and finally seal the floor from within the interiors of the floor surface. It can be used in

- **Manufacturing**
- **Warehouses**
- **Commercial**
- **Airports facilities**
- **Railway facilities**
- **Airplane hanger**
- **Sports arenas**
- **Convention centres**

SERVICES

Structure strengthening & repairs

Structure strengthening is a process of upgrading structures to improve performance under existing load or to increase the strength of structural members to carry additional loads the need for structural strengthening is commonly driven by building codes deterioration change in use, or deficiencies caused by design and/or construction errors.

- Jacketing work with micro concrete
- Epoxy mortar application
- Epoxy injection grouting
- Glass fiber wrapping
- Carbon fiber wrapping
- Polymer modified cement mortar application

SERVICES

Coating for metal & concrete structures

Reinforced concrete is a composite material its structural performance is realised only when concrete and steel act in unison during the service life of the structure. the compressive and tensile loads are carried by concrete and steel respectively. Steel protects concrete from cracking under tensile loads and concrete protects steel from corrosion by providing an alkaline environment around it. So long as this happens, the reinforced concrete structures perform satisfactory. Even though the concrete can be a very strong material. it is also subje^t to deterioration . concrete can be porous so that chemicals can penetrate. The pores and attack the paste.

- UV resistance, chemical resistance epoxy coatings
- Food grade internal epoxy coating for pipelines and water tank
- High performance 100% solid PU/epoxy coating
- PU/EPU/Epoxy primers & sacrificial zinc rich primes

SERVICES

Epoxy and PU Wall coating in food and pharma industry

The clean room and Pharmaceuticals, labs, hotels and food and also require demands a very hygienic dust free coating also in specific condition along with hygiene and dust free atmosphere we need to provide anti-static properties shape in area with high voltage equipment we offer the entire range of systems for these typical area's as below.

- **PU wall coating**

Highly glossy to near finish

available in various colors

hygienic and easy to clean dust proof surface

- **EPOXY base coving**

Pencil coving for wall to wall corner

Thick coving for floor to floor corner.
